Professional Summary

Computer Science student at FAST NUCES Lahore specializing in Full Stack and AI & ML Development, experienced in building scalable web applications. Strong understanding of software engineering fundamentals with practical experience in frontend & backend development and model training in AI & ML

PROFESSIONAL EXPERIENCE

Machine Learning Fundamentals Intern — NeuroFive Solution

Remote | Jul 2026 – Aug 2026 (2 months)

- Built and trained ML/DL models on the Titanic dataset for survival prediction, covering data visualization and preprocessing
- Deployed trained models to GitHub for version control and reproducibility
- Evaluated model performance across multiple approaches to improve prediction accuracy

EDUCATION

BS Computer Science — FAST National University, Lahore

2024 – Present

- Awarded Dean's List Certificate

2022 – 2024

Intermediate in Computer Science (ICS) — Punjab Group of Colleges, Kamoke

- PEEF Scholarship recipient

SKILLS

Programming Languages: C, C++, Python, SQL, JavaScript

Web Technologies: React, FastAPI, Tailwind, HTML, CSS

AI/ML Libraries: NumPy, Pandas, Matplotlib, scikit-learn, TensorFlow

Tools: Git, GitHub, VS Code, Jupyter, Google Collab

Platforms: Jira, Figma

APIs: REST API

Core Concepts: Object-Oriented Programming, Programming Fundamentals, Data Structures, Database Systems, Operating Systems, DevOps, Cloud Computing, Software Design and Analysis, Problem Solving, Logical Thinking

Soft Skills: Communication, Teamwork, Collaboration, Leadership, Time Management

PROJECTS

Emotion Detection System

- Implemented a machine learning model using Python, Streamlit and TensorFlow with image preprocessing and class classification to detect emotion is Angry, Disgust, Fear, Happy, Sad, Surprise, Neutral

MediFlow System

- Developed a full-stack hospital system using React, Node.js, and SQL with role-based data management, API integration, and team workflow handled via Jira and GitHub. Uploaded on GitHub profile

Spam Detection System

- Implemented a machine learning model using Python, Pandas, and scikit-learn with text preprocessing and classification to detect spam and ham messages

Social Media Application (C++)

- Built a C++ application applying OOP principles with class-based architecture and relationships like aggregation and association for user interaction handling

Calculator Receipt Web App

- Developed a JavaScript-based billing app with dynamic input handling and real-time calculation logic for generating payment receipts

CERTIFICATIONS

- Machine Learning Specialization — DeepLearning.AI (Coursera), 2026
- Deep Learning Specialization — DeepLearning.AI (Coursera), 2026
- Backend with FastAPI — Packt (Coursera), 2026
- Intro to DevOps — IBM (Coursera), 2026
- Intro to Cloud Computing — IBM (Coursera), 2026
- Technical Leader — University of Colorado Boulder (Coursera), 2026
- Interpersonal Skills — IBM (Coursera), 2026
- Computer Application Diploma (CCA) — IT College KMK
